

Capstone Week 2

Introduction

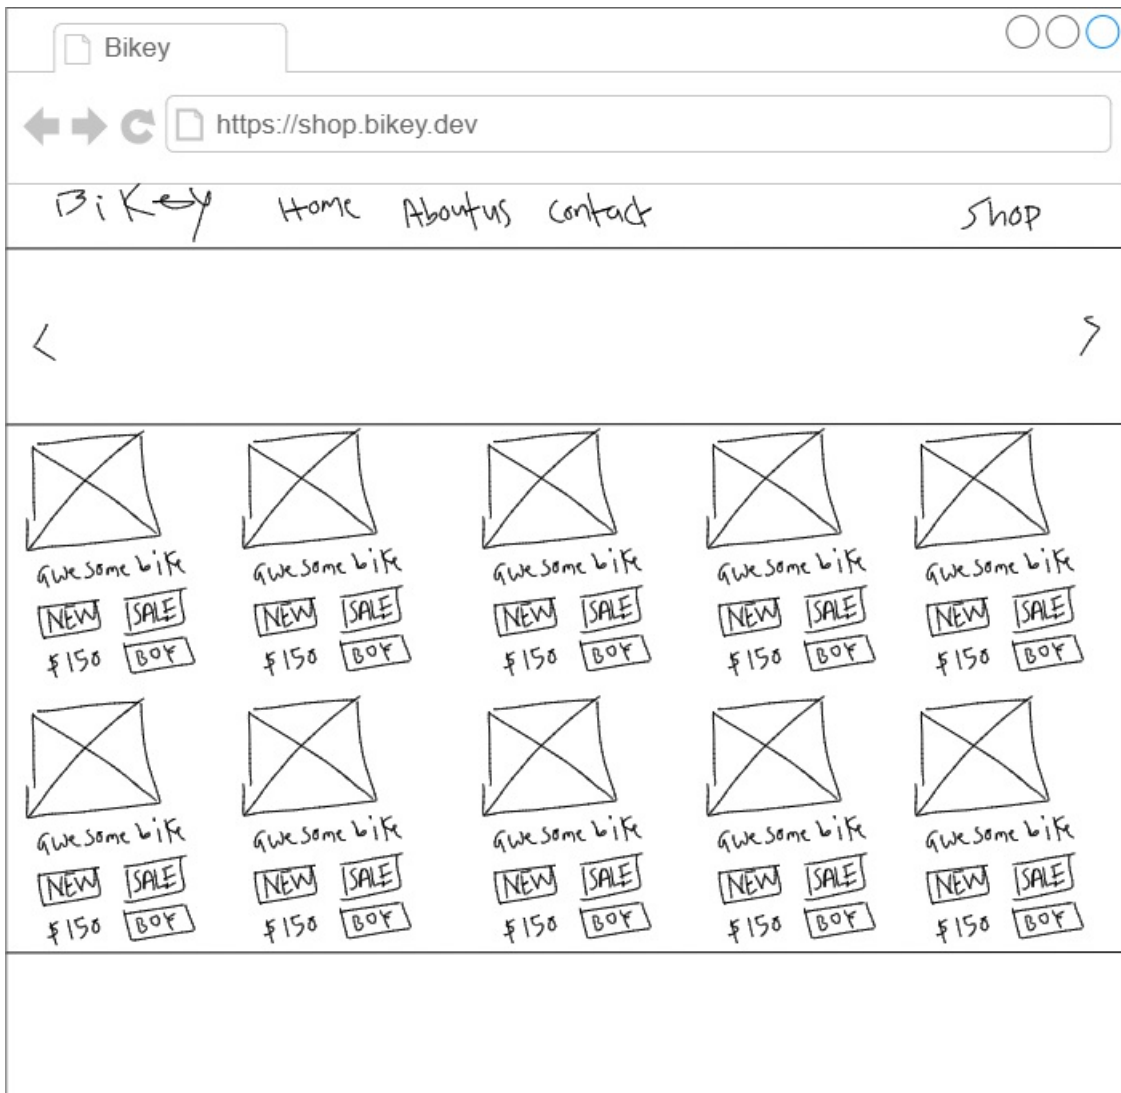

- This project is a view for a website for an online shop.
- The user navigating through the website is supposed to find information about the company, also (s)he should be able to buy what is needed once she decides.
- Hence the view should comprise at least the following
 - A page for shopping
 - Information about the company
 - Kind of a contact form.

User Interface Design and Prototype

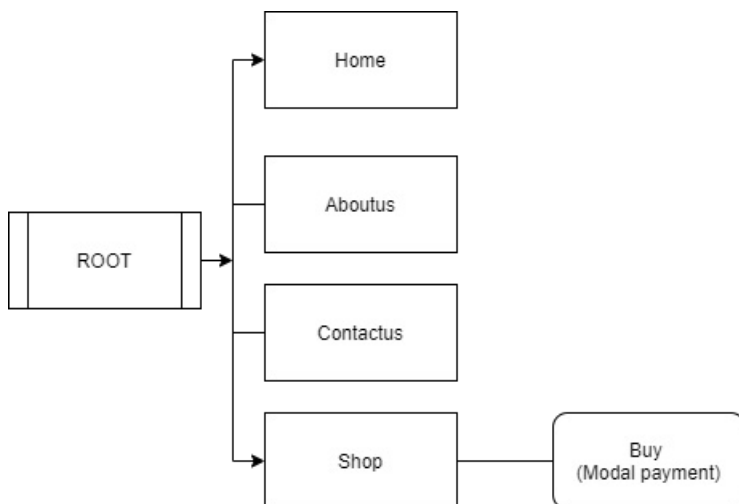

Homepage which overviews what the website is having to offer

Shop page which lists the products ready to be sold to the user

Navigation Structure
