# Capstone Report

Introduction

- This project is a view for a website for an online shop.
- The user navigating throught the website is supposed to find information about the company, also (s)he should be able to buy what is needed once she decides.
- Hence the view should comprise at least the following
    - A page for shopping
    - Information about the company
    - Kind of a contact form.
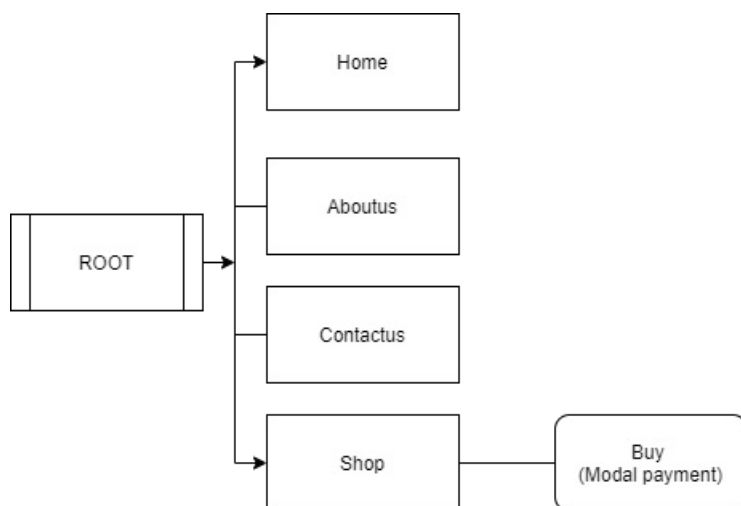

User Interface Design and Prototype

Homepage which overviews what the website is having to offer

Shop page which lists the products ready to be sold to the user
